# Cameron Park Master Plan Revisions & Site Design

City of Sunbury, PA

Stahl Sheaffer was selected to provide master plan revisions and site design for renovations to the featured park in central Sunbury.

Stahl Sheaffer's efforts focused on designing an affordable project that fully respects the history of Sunbury and defines a path to the future of enhanced public space to bring social, physical, and economic benefits to the City.

Close coordination with PennDOT was necessary for this particular project since the park is surrounded by a State roadway. Stahl Sheaffer included provisions to maintain pedestrian traffic and to provide for the safety of pedestrians during construction.
