# Field Hockey Stadium Structural Design

The Pennsylvania State University, University Park, PA

Stahl Sheaffer designed the installation of a new scoreboard and A/V control booth, and conducted feasibility studies for perimeter fencing, retaining wall, spectator viewing, and bleacher railing modifications for the field hockey facility, all against a tight deadline leading up to the start of the season.

Stahl Sheaffer is now subsequently under contract and have completed design development for an \$8M upgrade project for the Penn State Field Hockey Stadium including a new press-box, bleachers, concessions, locker rooms and restrooms.
