

Allegheny Tunnel Rehabilitation

Pennsylvania Turnpike Commission, PA

Stahl Sheaffer provided construction inspection and management services for the rehabilitation of the eastbound tube of the Allegheny Tunnel on the Pennsylvania Turnpike between Mileposts 122.18 and 123.34. Stahl Sheaffer, along with their subconsultants, had one construction manager and four construction inspectors ensuring the proper completion of all contract repair items such as crack sealing, shotcrete repair, concrete repair, electrical upgrades, new signalization beacons, painting the tunnel face, and mechanical upgrades. Additionally, Stahl Sheaffer facilitated construction meetings, ensuring proper traffic control, evaluating contractor schedules, conducting constructability reviews, and ensuring adherence to EEO, wage rate, and safety methods. Stahl Sheaffer's Director Michael Marso served as the Agreement Manager.
