Condominium Structural Observations

Golden Orchards Condominium Association, Centre County, PA

Stahl Sheaffer provided structural observations and repair recommendations based on element conditions as they were exposed during the rehabilitation of the stone veneer and vinyl siding facades.

Stahl Sheaffer visited the construction site and surveyed the condition of the existing framing after the facades were removed, documented the condition, and provided recommendations for repair or replacement of framing. At the completion of construction, Stahl Sheaffer provided a summary report of findings and recommendations.
