Alumni Center Hintz Courtyard Survey

The Pennsylvania State University, University Park, PA

Stahl Sheaffer provided services including a complete topographic survey, along with spot elevations covering the area requested, location of existing features, spot elevations to provide development of mapping coverage, and detailed information on existing sanitary and stormwater facilities including pipe types, sizes, and inverts based on field evidence and OPP coordination.

Quote from Penn State OPP:

"I have begun working with your file, and I just wanted to take the time to compliment the fact that you guys clearly put forth the effort to match our basemap standards. It greatly reduces our file clean-up time, and allows us to begin designing much more quickly. At this time, I don't have any questions or concerns regarding the survey, but as I get deeper into the design, I will let you know if anything comes up. Your efforts (along with everyone else at SSE) are greatly appreciated!"
