rmilne@stahlsheaffer.com

Stahl Sheaffer Engineering is pleased to welcome Robert R. Milne to our management team! He will serve as the Regional Office Manager in Morgantown and will lead West Virginia operations. He has 33 years of experience in the design and management of land development, roadway, and bridge design projects spanning multiple states and market sectors. Clients have included the WVDOH, West Virginia University, WVDNR, City of Morgantown, PennDOT, Pennsylvania Turnpike Commission, design firms, and additional state and municipal clients.

Mr. Milne's experience and expertise will expand Stahl Sheaffer's ability to serve clients in West Virginia as well as surrounding states.

"Rob brings with him the experience and expertise that allows Stahl Sheaffer to implement our strategic plan to expand our services across all of West Virginia, including the Eastern Panhandle and surrounding states. We are fortunate to gain the added value that Rob provides in enhancing project delivery and meeting client needs with his oversight and management of Stahl Sheaffer's highly experienced team providing site and transportation services for our clients." ~ Jeff Sheaffer, Principal, Stahl Sheaffer Engineering

Mr. Milne is a licensed professional engineer in West Virginia and Pennsylvania. He is a graduate of West Virginia University with B.S. and Master's degrees in Civil Engineering.

Founded in 2006, Stahl Sheaffer provides multi-disciplinary civil and structural services to public and private clients and was recently ranked as a top design firm in the ENR Mid-Atlantic Top Design Firms list for the sixth consecutive year. Stahl Sheaffer has 120 employees and [9 locations in Pennsylvania, Ohio, and West Virginia](#), including a Geotech lab in southwestern PA.
